Tanner Hammond

EDUCATION

Ohio University | Athens, OH **May 2025**
B.A. Biological Sciences — Environmental
B.S. Geography — Environmental
Certificate in Geographic Information Science (GIS)
Certificate in Environmental Studies, Sustainability, and Resilience

Relevant Coursework:

- **Ecology/Field Methods:** Wildlife Habitat Management, Animal Conservation Biology, Field Ecology, Biogeography, Restoration Ecology, Plant Ecology, Field Methods in Geography
- **Physical World & Policy:** Climatology, Principles of GIS, Principles of Remote Sensing, Global Issues in Environment, Climate Change Policy & Politics, Environmental Science & Policy, Biological Research Ethics

Southern State Community College | Hillsboro, OH **May 2021**
Associate of Science

RESEARCH INTERESTS

Mammals, landscape ecology, global change ecology, camera traps and similar remote monitoring technologies, computational applications in ecology (ex: computer vision), citizen science data, wildlife coloration as a functional trait

PUBLICATIONS

In Prep. Alvarenga, M., [...], **T. Hammond**, [...], Melo-Ferreira. Comparative niche modeling of seasonal camouflage identifies conservation priority areas for American weasels. For submission to The American Naturalist.

In Prep. Keim, C., […], **T.L. Hammond**, [...], W.J. McShea. SNAPSHOT USA 2025: Year 7 of the coordinated national camera trap survey of the United States [Data Paper]. For submission to Global Ecology & Biogeography.

2026 Weeks, B.C., J.S. Berv, Y. Cho, I. Clark, M. Cole, A.M. Ferentinos, J. Fuller, M. Guza, **T. Hammond**, Z. Li, C.M. Probst, S.W. Yanco, M. Ziebell, H. Zou, and M. Zimova. Exploring the data demands and global opportunities for reconstructing morphological responses to climate change. *Evolutionary Ecology*. 40(1), 11. [web] [PDF]

SOFTWARE

In Dev. ***camRa*: R package for manipulating and managing camera trap image data.** R package focused on managing, manipulating, and organizing camera trap data. Includes functions for examining MegaDetector/SpeciesNet classifications, editing images, downloading images from online sources, and interfacing with the Timelapse image tagging program. [Website] [Github]

In Dev. ***parallel.lsm*: R package for parallelized *landscapemetrics* functions.** R package providing wrappers for *landscapemetrics* functions that reduce processing time by using parallel processing. [Website] [Github]

PROJECTS

* Indicates this project is related to a planned publication, but has not reached "in preparation" status.

Current **Utility of the SpeciesNet classification model for high-throughput trail camera image processing*.** Research project focused on the accuracy of SpeciesNet across taxa and the potential for incorporating SpeciesNet into high volume image processing workflows. In collaboration with Cleveland Metroparks. Role: Project Lead.

Current **Extraction of avian color information using citizen science data.** Personal project examining the efficacy of using color data from citizen science sources (iNaturalist) as a mechanism for understanding spatio-temporal variation in northern cardinals.

Current **Integrated species distribution modeling for modeling weasels in Ohio and Indiana using camera trap, citizen science, and museum data***. Research project aimed at modeling weasels abundance with limited existing data using integrated nested laplace approximation (INLA) distribution models. In collaboration with researchers from Ohio University, University of Wyoming, Purdue University, Ohio Department of Natural Resources and Cleveland Metroparks. Role: Project Lead. [Recent Poster, Winter 2026]

2024 **Scale-dependent responses by white-tailed deer to habitat configuration and fragmentation**. Research project focused on the effects of choice of sampling extent on landscape variable calculation and the use of multi-scale occupancy models. Capstone project for completion of B.S. in Geography degree at Ohio University. [PDF]

WORK EXPERIENCE

Jun 2025–Sep 2026 **Wildlife Research Technician**, Cleveland Metroparks

Dec 2025–Mar 2026 **Small Mammal Field Technician**, McCleery Lab, University of Florida

Jun 2025–Oct 2025 **Invasive Species Field Technician**, McCleery Lab, University of Florida

Aug 2024–Jun 2025 **Undergraduate Research Assistant**, Zimova Lab, Ohio University

Jun 2024–Aug 2024 **College Intern — Geographic Information Science**, Ohio Environmental Protection Agency

May 2023–Aug 2023 **Biological Science Aid**, Hopewell Culture National Historical Park, National Park Service

Jun 2022–Jan 2023 **Trail Intern**, Ross County Park District

CONFERENCE & PROFESSIONAL PRESENTATIONS

* indicates presenting author(s). Presentations without * were shown but not actively presented by the authors.

2026 **Hammond, T***, N. Byer, and J. Cepek. *Can we trust the machine? Utility and accuracy of wildlife classification models for locating rare species in a metropolitan camera network*. Poster presented at the 11th annual Symposium for Ecological Research (SEARCH) hosted by Holden Forests & Gardens. Kirtland, OH. [PDF]

2026 **Hammond, T**, N. Byer, J. Cepek, M. Cole, C. Dennison, C. Hetrick, B. Kohli,, E. Wyza, and M. Zimova. *Using data integration to improve current distributions of elusive mustelids in Ohio*. Poster presented at the Ohio Wildlife Management Association Annual Conference. Columbus, OH. [PDF]

This document last updated 08/06/2026.

2025 **Hammond, T.***, M. Cole*, C. Hetrick, N. Byer, J. Cepek, C. Dennison, B. Kohli, E. Wyza, and M. Zimova. *Hide and sneak: mapping distributions of elusive mustelids in Ohio*. Poster presented at the American Society of Mammalogists (ASM) Annual Meeting. West Lafayette, IN. [PDF]

2025 **Hammond, T.***, M. Cole*, C. Hetrick*, and M. Zimova. *The real weasels of Ohio: where are they now?.* Poster presented at the Ohio University Student Expo. Athens, OH. [PDF]

2024 **Hammond, T.*** *Choice of scale can change outcomes in ecological studies: the case of white-tailed deer*. Poster presented at the Ohio University Geography Department Capstone Symposium. Athens, OH. [PDF]

ORGANIZATION & PROFESSIONAL SOCIETY INVOLVEMENT

Jul 2025–Current **Member**, The Wildlife Society

May 2024–May 2025 **Treasurer**, Climate and Sustainability Ambassadors Student Organization, Ohio University

PROFESSIONAL DEVELOPMENT

2025 Introduction to Meta-Analyses & Systematic Reviews for Mammalogists Workshop. At the American Society of Mammalogists (ASM) Annual Meeting. West Lafayette, IN.

AWARDS

2025 Undergraduate Student Research Poster Award. Ohio Center for Ecological and Evolutionary Studies (OCEES), Ohio University. Amount: $200.

2024 Taskey-Civivello Family Scholarship in Geography. Department of Geography, Ohio University. Amount: $300.
